QA Lead

Position Summary:As a Senior QA Engineer, you will be working alongside all development team members to improve the Lavu iPad-based restaurant point-of-sale app and supporting iOS and Web applications. This role requires a highly-motivated individual who is comfortable with rapid changes in direction and environment. The ideal candidate is customer oriented, results driven, and passionate about delivering innovative quality service. To be successful, you will need to work well in a fast paced, entrepreneurial environment.

Requirements:

- Bachelor's Degree or equivalent professional experience in related field.
- 4-5 years of Mobile QA testing processes; along with application design, tools, and methodologies.
- Practical working knowledge of mobile application platforms and development for (Apple iOS, Google Android, and Microsoft Windows Phone).
- 2-3 years of hands-on experience creating and maintaining both automated and manual scripts.
- Proficient experience with Mobile Automation tools including Selenium, Appium, or Cucumber.
- Exposure to and understanding of XML, JSON, HTML, CSS, PHP, and Responsive Web Designs.
- Experience working with relational database and working knowledge of SQL.

Additional Skills and Experience:

- Experience working in an Agile/Scrum environment, along with JIRA, Bitbucket, Slack, and Git.
- Strong problem solving & analytical skills; ability to document complex technical problems.
- Experience in testing web services (REST, JSON, and SOAP).
- Knowledge of Linux, writing SQL Queries, and other web technologies are a plus.
- Restaurant experience a plus.

Additional Information: If you've got vision, drive, and a roll-up your sleeves attitude, you'll fit right in. We're self-starters who are passionate and enthusiastic about we do. Our culture is high output and low drama—doing great work, constantly improving and celebrating our success. Ask around, you'll find that many people want to be part of a team like ours. The Lavu team is inventing new technology solutions that are both elegant and scalable, and if that fires you up, get in touch with us.
